

Exchanging Medical Records During Disasters – ESF8 Medical Response

CONNECT Gateway Data Transmission

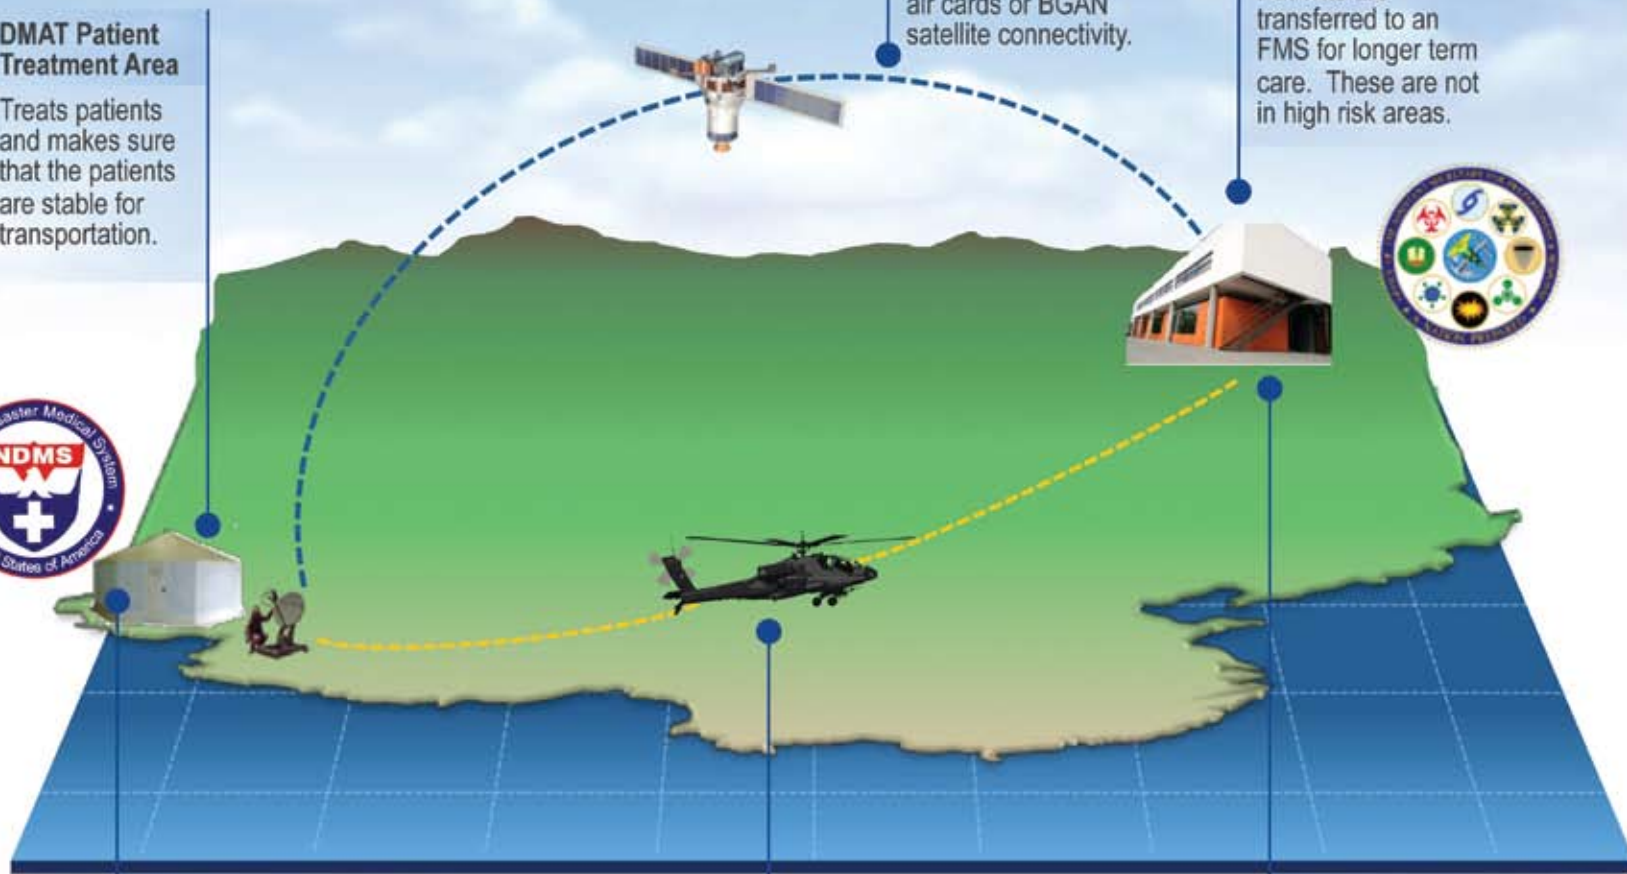

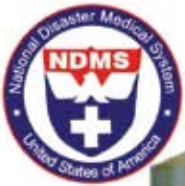

Data transmitted via
air cards or BGAN
satellite connectivity.

Federal Medical Station

Patients are
transferred to an
FMS for longer term
care. These are not
in high risk areas.

DMAT Patient Treatment Area

Treats patients
and makes sure
that the patients
are stable for
transportation.

Typical DMAT Base of Operations.

Patient Transportation

Patients
transported via
ambulances,
helicopters, rail,
and busses.

200 Bed FMS Fixed Facility
